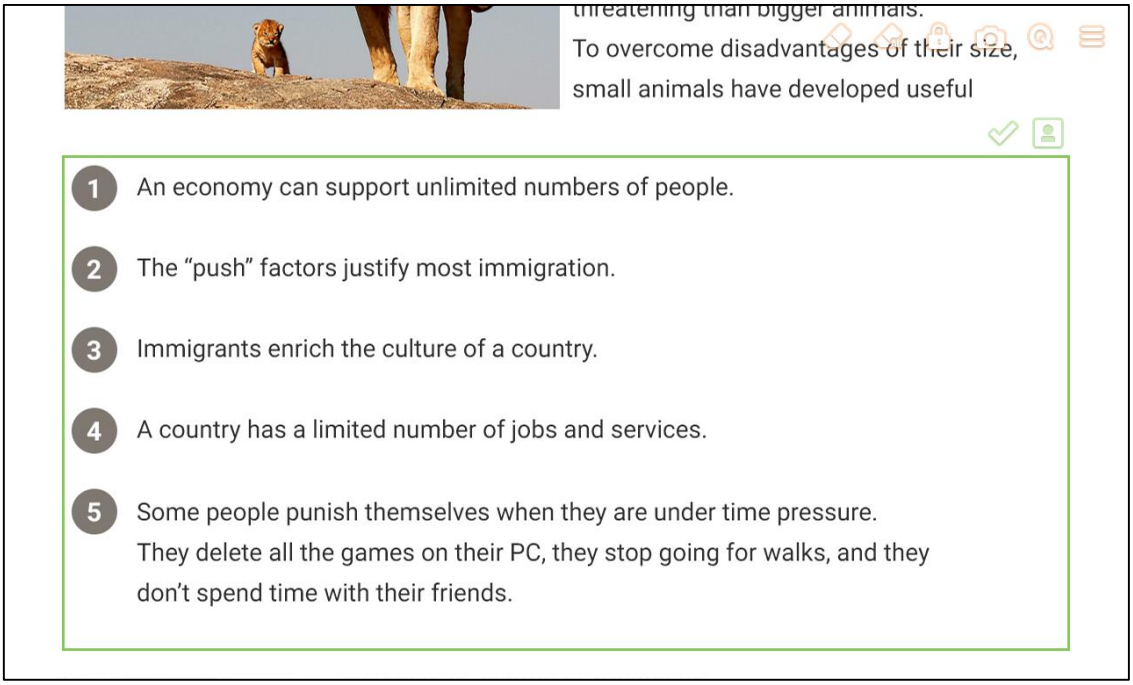
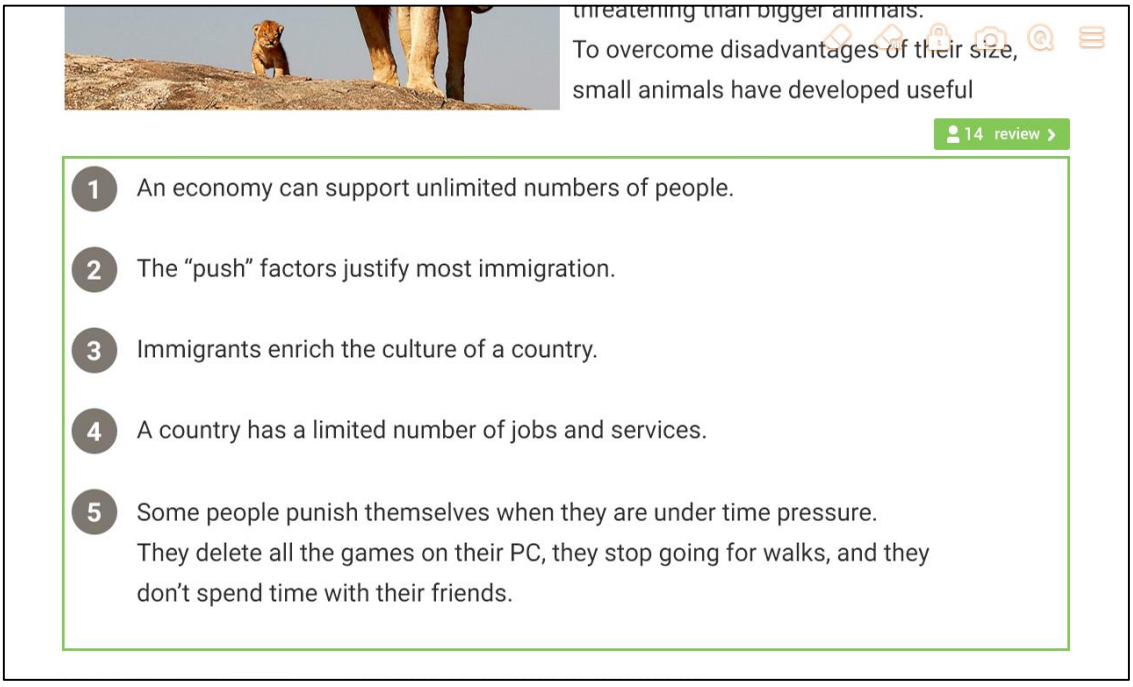
Answering a Question

Questions can be made from the Active Slide Builder. The interactive questions can only be made via the Question pages.



Stopping Submission

Answers are the sent to the teacher in real-time. When the teacher touches the question, the teacher's tablet displays the number of students who have submitted their response. After the teacher presses the "review" button, students can no longer modify their responses. The teacher can show the correct answer and review student responses.



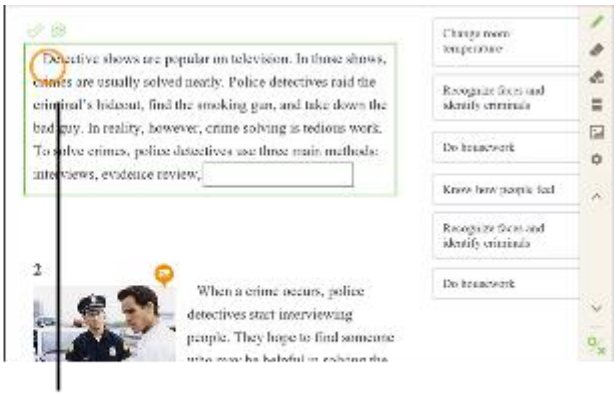
Viewing Answers

Use this menu to show the answers.
Note: Answers need to be set during question creation.

Select the check mark to display the correct answer on the teacher's tablet. The students' results appear as an O/X (Note: a score may not appear depending on the type of question slide).

- The check mark will remain inactive if no answer is specified.

The answers appear in orange.



The result is displayed.

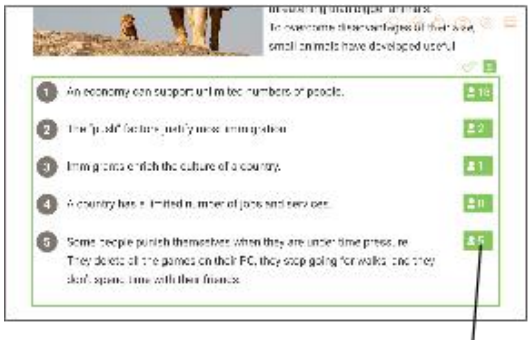
Note: Answers are not available with drawing and essay-type questions. Scores need to be manually inputted because there is no fixed answer.

Showing Student Responses

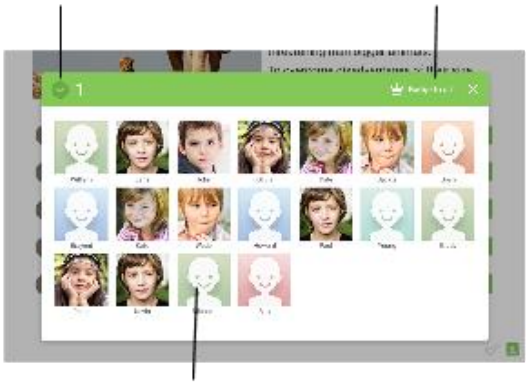
This is the menu to check the submitted student responses. The view mode may vary depending on the question type.

- Multiple Choice/ Drag & Drop/ Map

Choice questions display the number of students who chose each response. When the number is selected, student thumbnails pop-up.



The choice responses are displayed.



Long hold on top of a student's name to send a student a badge.

- Short Answer

There are two ways to view the students' responses, by answer and by student. By answer, all responses are displayed according to input. By student, thumbnails of the students are available alongside the students' responses.

If the response is correct, the teacher can score accordingly.

Switch to view by students.

Displays the number of students who chose a response.

- Essay-type Answer/ Drawing

Students' names, thumbnail pictures, and answers can be seen. Students can be seen in groups of 16, 9, 4, or 1.

Displays in groups of 16

Displays in groups of 9

Displays in groups of 4

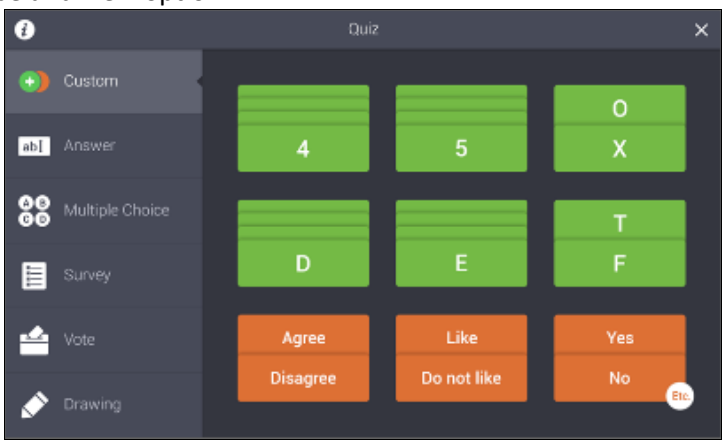
How to Use Quizzes

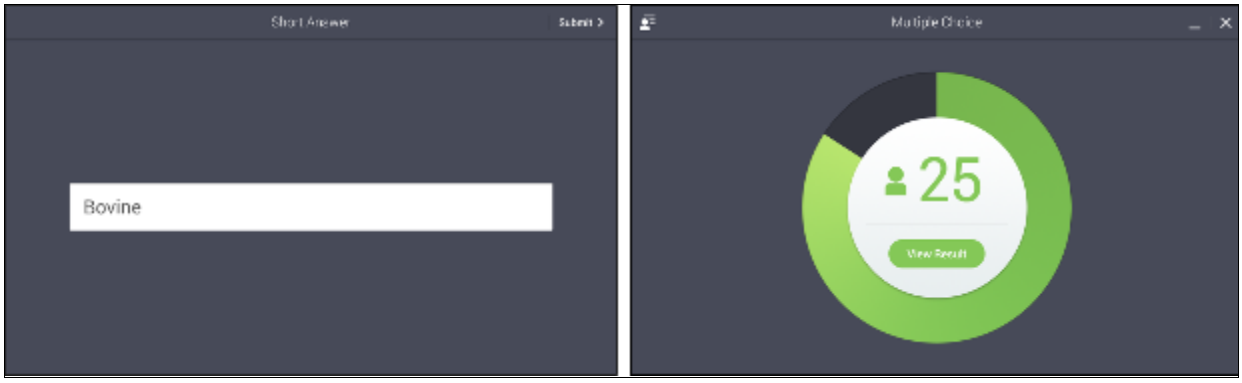
During class, the quiz function sends on-the-spot questions to collect student feedback. There are 5 types of quizzes, and there are different options and views for each type.

Using Quizzes

1. Select the Q icon on the toolbar to begin a quiz.
2. Select the quiz type and view option.



3. Wait until the students submit their response. Depending on the quiz type, the result screen will look different for the teacher and students.



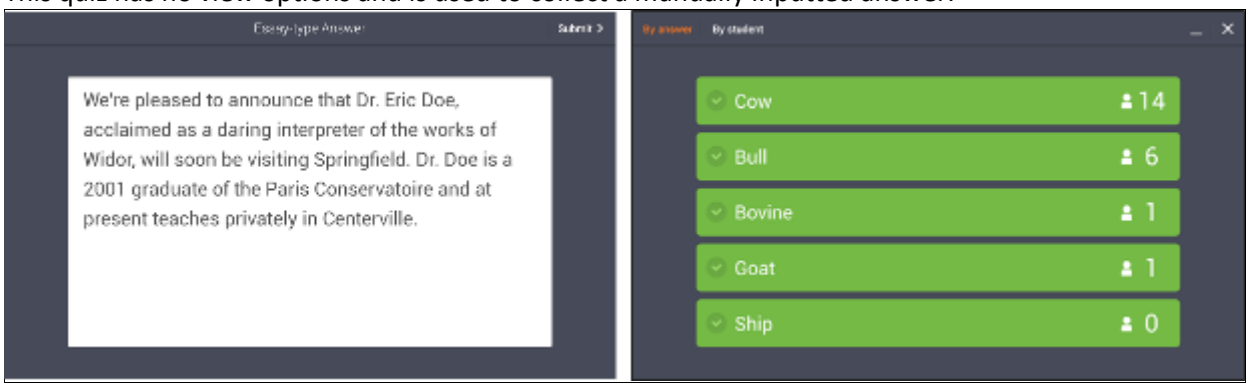
Teacher's tablet

- The response form sent to the students differs depending on the quiz type. The response is sent once the students select the submit button.
- Displays the student list.
-

Displays the submitted answers.

Short Answer

This quiz has no view options and is used to collect a manually inputted answer.

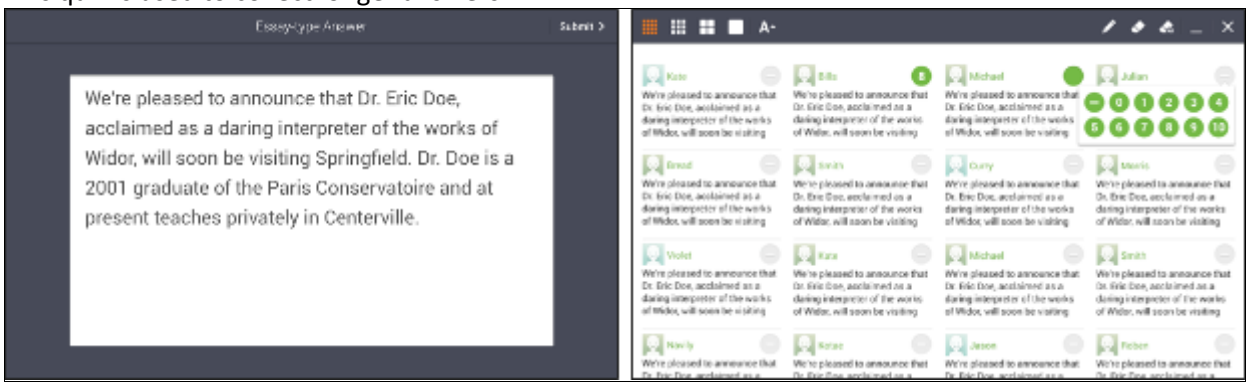


Student Tablet Teacher Tablet

- The teacher can view the responses by answer or by student.
- By answer: This view displays the responses by answer. Selecting a particular answer will mark that answer as correct.
- By student: This view displays the responses by student. Selecting a student will mark that answer as correct for that student and other students with the same answer.

Essay-type Answer

This quiz is used to collect longer answers.

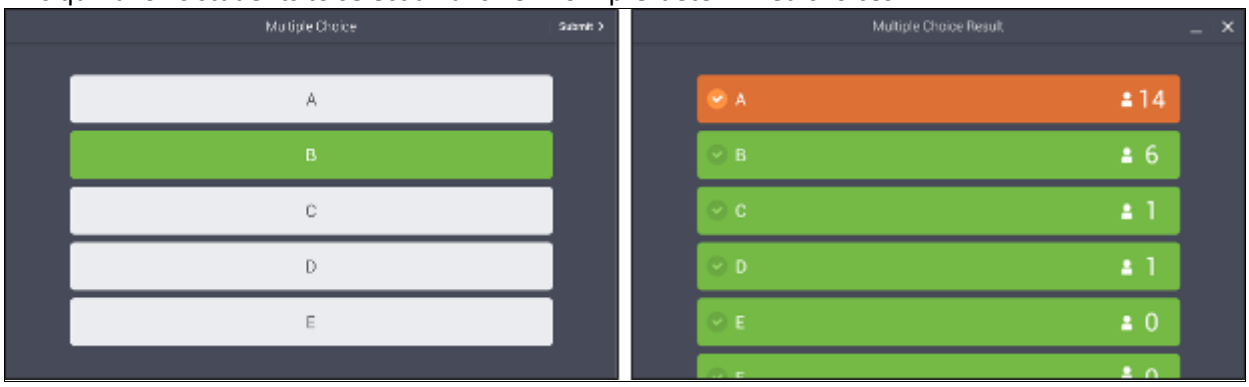


Student Tablet Teacher Tablet

- The tile view displays the answers by 16, 9, 4, or 1 tile(s).
- The students can be given a score from 0-10.

Multiple Choice

This quiz allows students to select an answer from pre-determined choices.

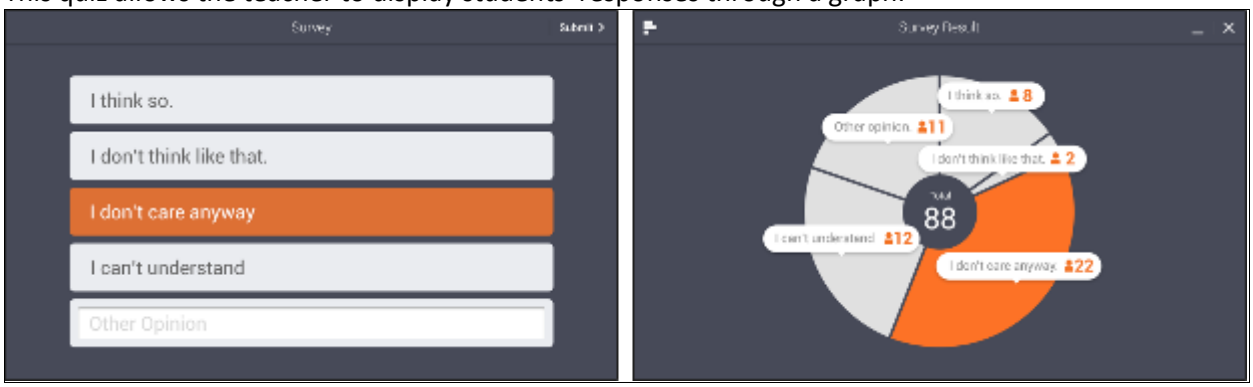


Student Tablet Teacher Tablet

- The answer that the teacher selects as correct will be reflected to all the students with that choice.

Survey

This quiz allows the teacher to display students' responses through a graph.



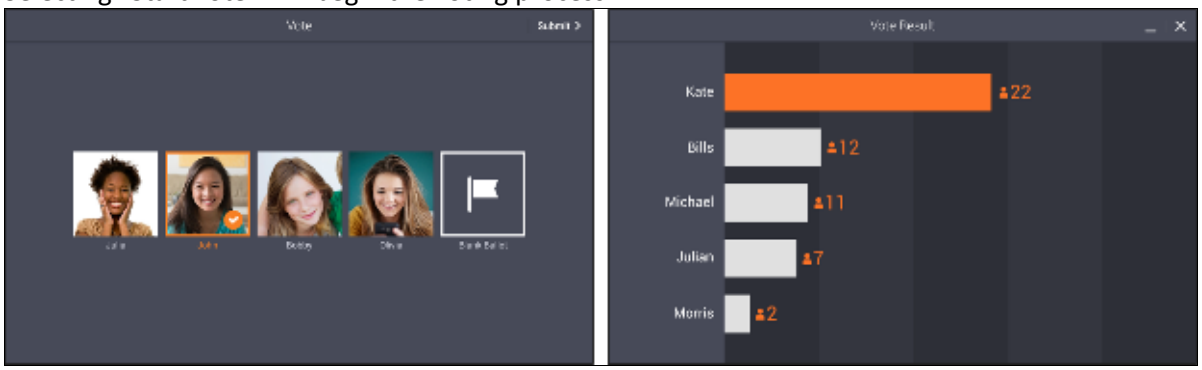
Student Tablet Teacher Tablet

- Students can manually input their suggestions if none of the choices apply to them.
- The results can be viewed in a bar graph or a pie chart. The most popular response will be highlighted in orange.

Vote

This quiz allows students to vote for their peers.

- The teacher selects the candidates from the students who have attended class.
- Selecting “Start vote” will begin the voting process.

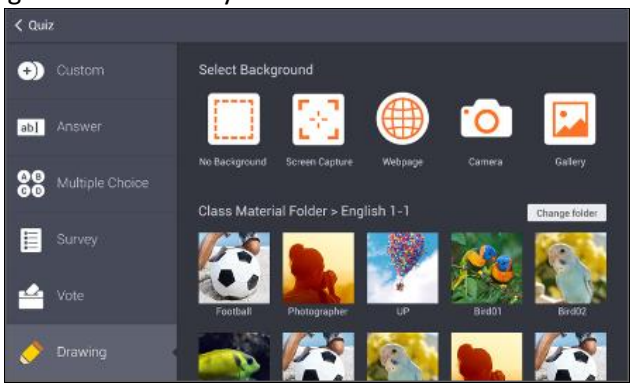


Student Tablet Teacher Tablet

- The options are the selected students.
- The results are displayed as a bar graph. The student with the highest selection is displayed as a different color.

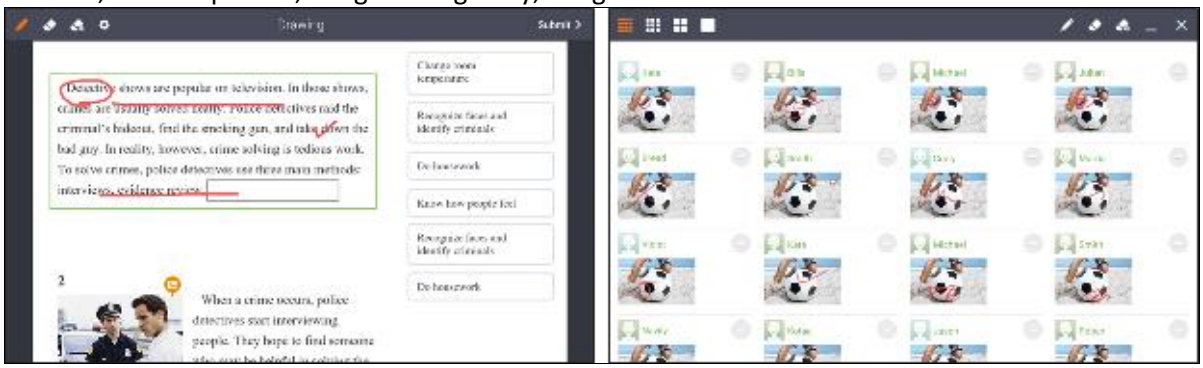
Drawing

Students draw on a background selected by the teacher.



Background option

- The selected image is used as the background for the students to draw on. Various options are included, such as: No background, Screen capture from the current page, Screen capture from a website, Camera picture, Image from gallery, Image from the material folder.



Student Tablet Teacher Tablet

- Students select Submit after drawing on the sent background.
- The tile view displays the answers by 16, 9, 4, or 1 tile(s).
- The students can be given a score from 0-10.

Giving a Badge

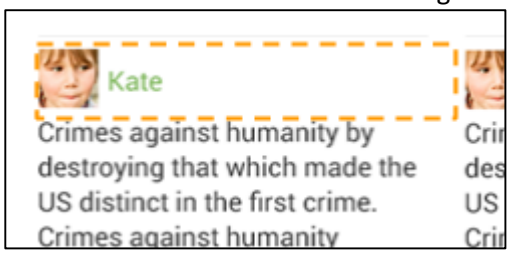
Reward students with Badges when they have done well in an activity.

Giving badges to individual students

1. Select the student to give a badge to.
   - From the more menu, select a student. Long-hold the student's picture.

   - Long hold the student's picture after they have answered a question.

   - View the students' answers in tile view and select and long-hold the student's name.

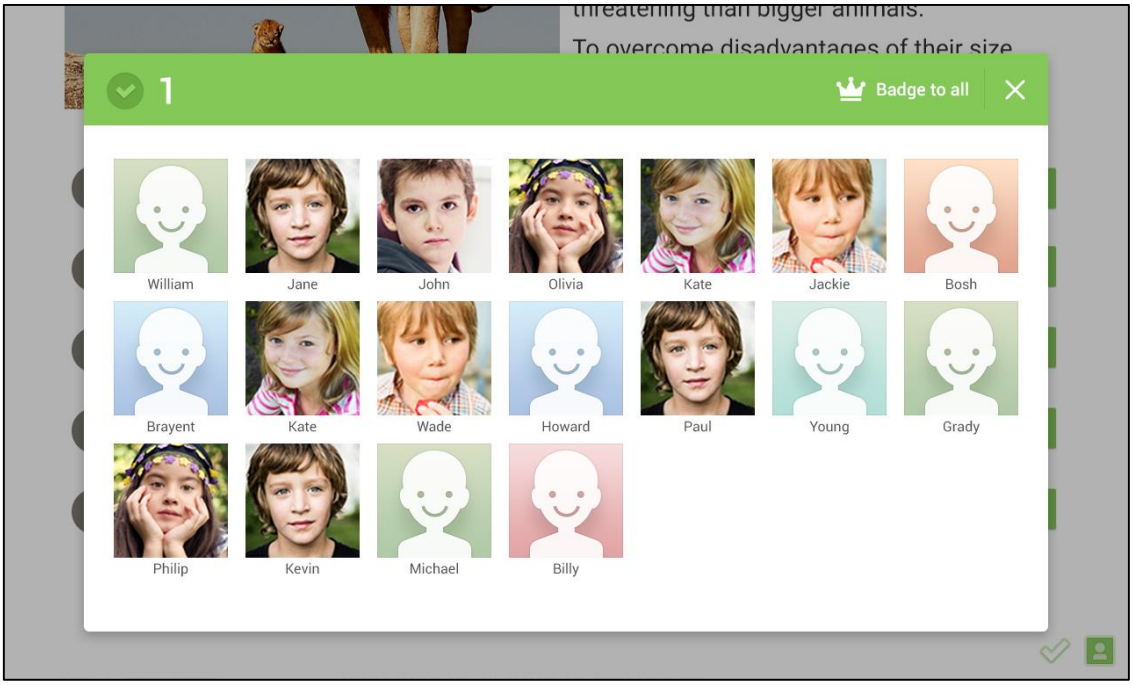


2. Select a Badge from the pop up list.
3. A badge icon will appear next to the student's name.

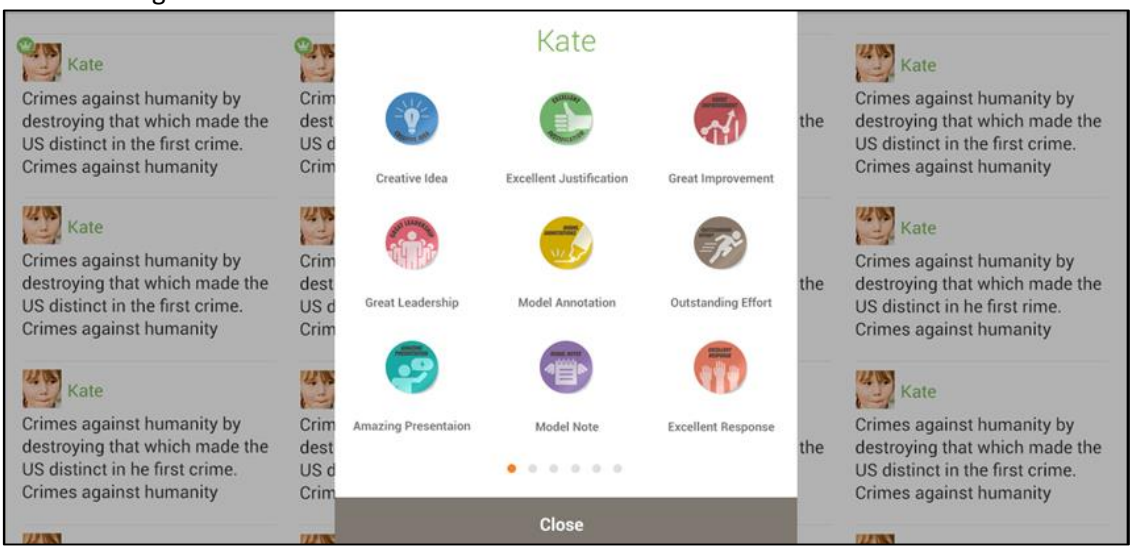
Sending Multiple Badge at Once

After solving a problem or taking a quiz, give students who have the same response a Badge at the same time.

1. Select “Badge to All” in the answer screen.



2. Select a Badge from the pop up list.
3. A badge icon will appear next to the student’s name.

Badge popup


The teacher can send default badges or create their own badges. Flick the page left and right to find the desired Badge.
